

How St. Francis de Sales Helps Me to Grow

By: Meghan

8th Grade

Faith at St. Francis de Sales is very powerful. Everyone cooperates in many ways, to impact the lives of individuals, and make our small community a better place to live. Our learning place is very involved in charity work. The 8th grade class organized a school supplies drive for the University of Dodoma, Tanzania. All of the classes and staff's generous donations will enhance the children's learning environment, and provide students and teachers with materials for a new school building that is being built. Food packaging events and Christmas shopping for kids in need are other methods of supporting close members in town and even across the world. In school, classes get to portray the Stations of the Cross and say the Rosary all together. At Mass, our school does annual food drive collections for the food pantry. All of these great things our private Catholic school has accomplished are changing lives.

Excellence is spread all throughout. High school is near for the class of 2021, teachers are providing us with very useful skills that will make us go very far in the future. Note taking is very important in the world of organization. There have been so many given opportunities on different ways of taking notes. Studying is significant in later years of education, so it was time to research and discover crucial techniques. Elective courses at school offer the opportunity to find things that interest students, and to develop skills that will carry with them through their life.
